

Sad Together

Olivia O'Brien

I would never kill myself, I'm too afraid to die but
To say I've never thought about it, that would be a lie
And I know it sounds depressing but I know you feel the same
Life is just a lesson and we gotta learn through pain

So let's drink up and celebrate
Pour another one for the ones we hate
Life sucks anyway
But I don't wanna be the one to sit and wait

Cuz we're born alone, we die alone
But right now I don't wanna cry alone
And we know nothing's gonna last forever
So let's be sad together
You're not alone when you feel alone
And right now you don't gotta be alone
Cuz you know nothing's gonna last forever
So let's be sad together

Not the only one, everybody goes through it
Swallowing the gun, but I know I won't do it
We can make it fun, even if it's all useless
Why you tryna run, just stay with me

So let's drink up and celebrate
Pour another one for the ones we hate
Life sucks anyway
But I don't wanna be the one to sit and wait

Cuz we're born alone, we die alone
But right now I don't wanna cry alone
And we know nothing's gonna last forever
So let's be sad together
You're not alone when you feel alone
And right now you don't gotta be alone
Cuz you know nothing's gonna last forever
So let's be sad together

Drink up, celebrate (celebrate)
Pour another one for the ones we hate (ones we hate)
Life sucks anyway
So I'm not gonna sit and wait

Cuz we're born alone, we die alone
But right now I don't wanna cry alone
And we know nothing's gonna last forever
So let's be sad together
You're not alone when you feel alone
And right now you don't gotta be alone
Cuz you know nothing's gonna last forever
So let's be sad together

Let's be sad together
So let's be sad together
