

# Alchemy

Ollie

(One, two, three)

Yeah

Run into the open, followin' my fear  
Universe conspirin', tryna bring me near  
Like alchemy, what I felt was me, yeah  
Prayin' for survival, underneath the stars  
I can see I'm home now, feel it in my heart  
That's all I need, took years to see  
My treasure was here from the start

I'm already makin' it through  
Runnin' out of patience, got lost  
If I just get up, I can't lose  
Time away showed me what I got

Yeah, nothing's gon' be what it used to  
When you realize things you missed  
And it's easier to say, "In hindsight"  
With the anger held in my fist  
Further than my thoughts imagined  
Was the place I didn't think exists  
I didn't think exists, but it did (Ayy)

Run into the open, followin' my fear  
Universe conspirin', tryna bring me near  
Like alchemy, what I felt was me, yeah  
Prayin' for survival, underneath the stars  
I can see I'm home now, feel it in my heart  
That's all I need, took years to see  
My treasure was here from the start

Life just waitin', my soul unshaken  
The best I do is to love what I got  
Tears keep wastin', for change I'm makin'  
This so-so world is more than I thought  
Life just waitin', my soul unshaken  
The best I do is to love what I got  
Tears keep wastin', for change I'm makin'  
This so-so world is more than I thought
