

Caught Fire

Ollie

Caught fire when you walked my way
You're not tryna fall in love
But your eyes lighting up my face
Should've probably turn an run
You're lips my lips ain't felt the same
You broke my heart but I'm to blame
Caught fire when you walked my way
You not tryna fall in love
(You not tryna fall in love)
(You not tryna fall in love)

You're lips my lips ain't felt the same
You broke my heart but I'm to blame
Caught fire when you walked my way
You not tryna fall in love

I wish I knew that
Can't take my mood back
Not the type to move fast
But you had me right away
Stuck between a rock an hard place
My drink on the rocks cause you won't stay
Without you I feel lost but I'm okay
We together lonely not the one that you need

Caught fire when you walked my way
You're not tryna fall in love
But your eyes lighting up my face
Should've probably turn an run
You're lips my lips ain't felt the same
You broke my heart but I'm to blame
Caught fire when you walked my way
You not tryna fall in love

I selfishly did
Exactly what you told me not too I can't lie
Fell on some weak shit
An maybe that's wrong but the feeling so right
You know, would never let you go
If I could choose I would make you all mine
I understand it hurts, not tryna make it worse
I know, I know you'll be just fine

Caught fire when you walked my way
You're not tryna fall in love
But your eyes lighting up my face
Should've probably turn an run
You're lips my lips ain't felt the same
You broke my heart but I'm to blame
Caught fire when you walked my way
You not tryna fall in love
(You not tryna fall in love)
(You not tryna fall in love)
