

# Collide

Ollie

I preplanned on my directions but they got lost inside you...  
Can't hold back my heart's affection, comes in waves as I move... as  
I move

I told you from the start, how I can't let go  
I felt for everything you are  
Sens a real overload like there's a string around our hearts  
Not just chemical it's something more between us  
There's something more  
Yeah yeah

Eyes blue I can see you when I close mine  
Your voice on repeat in my mind  
All roads lead to you bringing me back  
I think that my love for you is blind  
I tried to be open-minded  
I left for months at a time  
I swear I could've lived ten thousand miles away and we still collide

Da da da da and we still collide  
Da da da da and we still collide  
Da da da da and we still collide  
Da da da da

Yeah...  
Push away from us, I still need you  
Can't escape this love I conceive  
If you jump I jump, we're connected  
It's expected when

I told you from the start, how I can't let go  
I felt for everything you are  
Sens a real overload like there's a string around our hearts  
Not just chemical it's something more between us  
There's something more  
Yeah yeah

Eyes blue I can see you when I close mine  
Your voice on repeat in my mind  
All roads lead to you bringing me back  
I think that my love for you is blind  
I tried to be open-minded  
I left for months at a time  
I swear I could've lived ten thousand miles away and we still collide

Da da da da and we still collide  
Da da da da and we still collide  
Da da da da and we still collide  
Da da da da
