

Forever

Ollie

Now I'm twenty-one, when I look around
I see everything from a new view
I've done made mistakes, I've done messed it all up
But I'ma keep on pushing 'til I see this through
'Cause I got, I got a whole life to learn
Yeah, and that's what I'ma do
Yeah, I got, I got a whole life to learn
Yeah, and that's what I'ma do

Started with a dollar, dollar and a dream
Such a cliché line, but it means the world to me
'Cause that's just how we started, still ain't nothing change
I use this music for my pain, music the only way I'm sane
I'ma keep working like a vet, this for my kids, kids, kids see
You know the north is what I rep, I think I'm goin' down in history
I think the whole world will miss me, I'm from the country sipping whiskey
Writing these bars when I'm tipsy, I got this whole town with me
This that dream I always gotta chase, this that new sound and new wave
This that same boy who went to prom all alone, tell me what you gotta say
I'm sending postcards from LA, I do this music every single day
I'm on the rise, look in my eyes, you see determination in my face, yeah
Started off inside my grandma's basement, MacBook and my mic
Shed a lot of tears past few years, now I'm feeling alright because of y'all
And when I say that, I mean it
It took a while, but now I see that this all happened for a reason, let's go

Now I'm twenty-one, when I look around
I see everything from a new view
I've done made mistakes, I've done messed it all up
But I'ma keep on pushing 'til I see this through
'Cause I got, I got a whole life to learn
Yeah, and that's what I'ma do
Yeah, I got, I got a whole life to learn
Yeah, and that's what I'ma do

This something I always pictured, now it's finally coming true
No one ever handed me nothing-I still got things I wanna prove
I still got people in the past, now they running back
Remember when they played my songs at the party as a joke, now everyone ask
Remember my first song "Visions," I never thought I'd make a livin'
Somedays I still think that I'm dreaming, this what I call intuition
This those middle fingers up, never give a fuck
Feelin' like the greatest in the game, y'all know the name, I'ma live it up
I've came to far to fail and I've given too much
I don't care who will try and stop me, I wanna blow up like Russ
I wanna do this for the underdogs and every single one of y'all
That working tryna make it and never get put up on a pedestal
We stay grinding in the shadows, always got told that we would plateau
Never took "no" for an answer, so we stay winning far as that goes
And I'm fine, knowin' I gave it all for something
Even if I fail, I know it ain't for nothin', and that's real like

Now I'm twenty-one, when I look around
I see everything from a new view
I've done made mistakes, I've done messed it all up
But I'ma keep on pushing 'til I see this through
'Cause I got, I got a whole life to learn

Yeah, and that's what I'ma do
Yeah, I got, I got a whole life to learn
Yeah, and that's what I'ma do
