

green leaves

Ollie

Flowers in July only come from months around
That's the truth that I try to tell you every day
All these butterflies in my stomach, who to blame?
Falling in love for real
Even when we fight, I know you gon' always stay
We both down to try, promise me you never change
Life don't pass me by, you too beautiful today
Falling in love for real

Falling in love for real
Yeah, I feel how I feel, yeah
Can't nobody tell me nothing
Why like no one tell me nothing?

All in my head again, flicker like Edison
You better stop
It's like you my medicine, I'm in my bed again
Thinking a lot
I just need settlin', you know I go, go through phases
You like a saddle and I just might blow, blow from way in
I feel so blue, like the color of your jeans
In my first car at seventeen
Life ain't always everything it seem
Tryna grow and be a bigger person
Even on the days you know I'm hurtin'
Changing like the colors of the leaves
'Cause you the only thing I know for certain

Flowers in July only come from months around
That's the truth that I try to tell you every day
All these butterflies in my stomach, who to blame?
Falling in love for real
Even when we fight, I know you gon' always stay
We both down to try, promise me you never change
Life don't pass me by, you too beautiful today
Falling in love for real

I know that it's scary when you fall, so I fall
We gon' jump in this together
You shine like the moon and the stars in my heart
I'ma keep you there forever
I know that it's scary when you fall, so I fall
We gon' jump in this together
You shine like the moon and the stars in my heart
I'ma keep you there
