

This That

Ollie

I built this all up out mud, you know this that
That job ain't finished till it's done, cut the chit chat
I really been through what I sung, there's no mismatch
They just don't make 'em anymore like me

I came too far to care what he said or she said
Time can heal a lot of wounds, never regret
Some nights I need that 90 proof, gotta reset
They just don't make 'em anymore like me

Everything these days cheap, nothing made to last
Only love you for the moment, but it's fading fast
Circle just like blood, never questioned that
Just like blood...

Small town kid, still the same, coming up I had to prove a lot
Everybody else fitting in, can't pretend to be the thing I'm not
I remember way back then, on them long nights I would pray to God
2 AM these feelings hit, I'm plugged in, my soul talk

And it's like... whoa, whoa
I got way too much in my mind these days, like... whoa, whoa
Gotta move along through the pain

I built this all up out mud, you know this that
That job ain't finished till it's done, cut the chit chat
I really been through what I sung, there's no mismatch
They just don't make 'em anymore like me

I came too far to care what he said or she said
Time can heal a lot of wounds, never regret
Some nights I need that 90 proof, gotta reset
They just don't make 'em anymore like me
