

Ask Me to Stay

Olly Murs

Sat on my bed and looked in my eyes
Saw I was grieving for some other time
Stood on my breath and moved close to say
Oh won't you love me let's walk out to play

Ooh we caught the moon from the sky
And wrapped it up with the love that we found in our eyes
And if the words don't tell me you love me
And if the night won't hold us as one
Now there is nothing left that can numb me
Do you love me or do I run

Why don't you ask me to stay?
Ask me to stay

Looked so surprised when she said to me
Can you move the mountain then we can both see
She fell in my arms then I melted away
She said why won't you ask me ask me to stay?
She picked up the pillow and lay down her head
We were loving like good friends again
Why don't you touch me, like we use to know
Move over and love me or let me go

And if the words don't tell me you love me
And if the night won't hold us as one

And if the words don't tell me you love me
And if the night won't hold us as one
Now there is nothing left that can numb me
Do you love me or do I run

Why don't you ask me to stay?
Ask me to stay

As first you make a wish and pray that things will never change

And then we reach the point of being just good friends again
