

# Danger

OmenXIII

Drone in the sky when the MISFIT watchin'  
Ghosts don't walk in, we got options  
The way we sneak in got you thinkin'  
We slide through walls and solid objects  
I live life tryna mind my business  
You live life tryna line your pockets  
Body gon' drop when you reach your limit  
Watch you rot as the clock tick-tockin'  
Trunk stay knockin', windows shakin'  
Blunt smoke coughin' with that Razer  
Keyboard up on my desk, I'm faded  
Typin' away, my pace outrageous  
Steady upgrade while the rest outdated  
Veins never laced with them chemicals  
Days in my brain turned me cynical  
Duck when the levels get critical  
Battle the king, but I know your weakness  
Shadows creep in, light can't leak in  
Rattle my cage, generate my anger  
Blade too quick, wanna meet your maker?  
Whatever you believe, you gon' find out  
Or you might not, what is life now?  
Everything here, everyone you held dear  
Separated from you and anything you know will disappear

Better go hide if you wanna stay alive  
When the Underworld demi-God begin to show his face  
Sun don't rise in the night time, I'm  
Steady creepin' and lurkin' about to find my prey  
Better go hide if you wanna stay alive  
When the Underworld demi-God begin to show his face  
Sun don't rise in the night time, I'm  
Steady creepin' and lurkin' about to find my prey  
Better go hide if you wanna stay alive  
When the Underworld demi-God begin to show his face  
Sun don't rise in the night time, I'm  
Steady creepin' and lurkin' about to find my prey  
Better go hide if you wanna stay alive  
When the Underworld demi-God begin to show his face  
Sun don't rise in the night time, I'm  
Steady creepin' and lurkin' about to find my prey

I'm in the dark, I'm in the shade  
Only in light while I sit 'round the flames  
Only at night will you see me again with my  
Scythe by my side, it will take you away  
Look in my eyes, I will set you ablaze  
You think you know but you do not know pain  
True pain is something that just can't be forgave  
Like existence, what we just call life on this plane
