

# Gone Forever

OmenXIII

If you're listening, take a picture  
Make it beautiful, keep it simple  
But still different, make it delicate  
Not too different, a little expensive

It doesn't have to be, but make sure it's better  
Don't do it on purpose, you shoulda known better  
I like lonely nights, through the stormiest weather  
I hope you don't miss me, cuz I'm gone forever

I saw your face in my memories  
Soft skin, white lace running over me  
Take back all the time that you took from me  
I was always alone in your company  
Kerosene kisses in a red hot summer  
If I close my eyes I can still hear thunder

If you're listening, take a picture  
Make it beautiful, keep it simple  
But still different, make it delicate  
Not too different, a little expensive

It doesn't have to be, but make sure it's better  
Don't do it on purpose, you shoulda known better  
I like lonely nights, through the stormiest weather  
I hope you don't miss me, cuz I'm gone forever

Nowhere left to go but down  
(I won't find you down)

I've been holding back so many tears  
So lost and alone  
Looking back at the mirror  
And I know, I know  
It's not hard to wait  
Now I'm walking away  
I forgot how to be in love  
I passed away  
I passed away  
I passed away  
I forgot how to be a ghost  
Don't cry for me  
Don't cry for me

If you're listening, take a picture  
Make it beautiful, keep it simple  
But still different, make it delicate  
Not too different, a little expensive

It doesn't have to be, but make sure it's better  
Don't do it on purpose, you shoulda known better  
I like lonely nights, through the stormiest weather  
I hope you don't miss me, cuz I'm gone forever

If you're listening, take a picture  
Make it beautiful, keep it simple  
If you're listening, take a picture

Make it beautiful, keep it simple
