

I'm steady closing in, with the reapers touch  
I can see you pushing, please don't push your luck  
Crawling up the river, moving through the brush  
I know that you can't challenge me, I hope that you can run

Let you run let you try  
But I still won't let you slide  
Because you looked me in the eyes  
So I just can't leave you alive

Let me go, and I'm gone, Armageddon like I'm spawn  
Omen13-37, B2 like a bomb  
A1 like the sauce, in the sauce you gettin lost  
I know I'm always killin shit but I don't think I can stop

Let me slide up in your playlist C-c-combo breaker  
Slippin slidin' makin plays and leave you cryin like I'm Faker

I do not fear demons, I do not fear angels  
Omen pull the blade and cut down XIII different haters  
Line em up like tapers, put em in the booth  
If I put white noise on the track then you'd still lose and tha  
t's the truth

I do not reside in light or darkness, find, me inbetween  
In the shadows I've been watching, waiting just for my release

You still haven't said anything that means a thing to me  
You can follow all you want I'll come and go just as I please  
Drop my eyelids as I breathe, In between the lines I read  
Follow my decree and if you don't then \_blnk will make you blee

First we ride, then we die  
Bitch we ride, then we die  
Yes we ride, then we die  
Bitch we ride, then we die
