

Lunar Vision

I am blades in the wrist, I am death in the flesh
I'm the plague of your kin, and just incase you did forget
I'm the dark in the night, I'm the truth in the lies
I'm the knife in the fight, I'm fang in the bite

I'm just doin me
You just fuckin stress
I'm just tryna eat
And I'm tryna rest
You're just tryna flex
I'm just tryna cope
You actin like the best
You're a fuckin joke

I thought I told you we are not the same
I thought I told you we don't never ever fuck with lames
What's in my brain some information intuition gave
This game is fucked up, I see all these kids is fuckin fake
I thought I told you we are not the same
I thought I told you we don't never ever fuck with lames
What's in my brain some information intuition gave
This game is fucked up, I see all these kids is fuckin fake

I am blades in the wrist, I am death in the flesh
I'm the plague of your kin, and just incase you did forget
I'm the dark in the night, I'm the truth in the lies
I'm the knife in the fight, I'm the fang in the bite

In the fight, In the fight, I'm the fang in the bite
In the fight, In the fight, I'm the fang in the bite
In the fight, In the fight, I'm the fang in the bite
In the fight, In the fight, I'm the fang in the bite
