

# Stop Hiding

OmenXIII

Yeah I'm depressed, at least I know it  
You're misled, you're losing focus  
You think you're happy, I know you're not  
You're so empty, just full of thoughts  
Just full of shit, you hate your job  
You hate your life, you hate to ask  
You hate yourself, but you keep breathing  
But you won't change, so what's that mean?

You're just delusional, confused and moving slow  
Misusing who you are, you let illusion show  
You're so oblivious, you say you wanna die  
But you can't take your life, and you're too scared to try

You're just delusional, confused and moving slow  
Misusing who you are, you let illusion show  
You're so oblivious, you say you wanna die  
But you can't take your life, and you're too scared to try
