

They Said The Sky Was The Limit

OmenXIII

You know I'm just doing me, could give a fuck if you criticize
I just want happiness, I've been too close to suicide
Now I gotta get it, yeah, yeah, this just my do or die
I'll let you sleep, just let me sing you a lullaby

I've been on the road, I've seen so many cities
Yeah, yeah, so many people, they come and go when they ready
It's out of my control, that just leaves me second guessing
Will you stay or will you go if things start to get too heavy?

Yea, I know some dealers
Yea, I might know some killers
I'm still in my city, out here they know I'm the realest
I'm just minding my business, but they say I'm acting different
I'm still an introvert, bitch, I was never pretending

I keep an eye on my bitches, yea, I stay right with my women
I know she wanna fuck with me, I know she want the benefits
Yeah, she's knows what I like, she knows what emojis to send me
Yeah, I know what she likes, so I give her love and affection

I feel like I'm in space, they said the sky was the limit
My expectations changed 'cause now we run up them digits
Now people come around and say they fuck with my vision
They say they got my back, but while they holding the trigger

The finger on the trigger doesn't make you a killer
And if you really killin', that don't make you no realer
They swear they something different, but I can't see a difference
If you don't do it for the love then I don't wanna talk business

Now I'm smokin' OG daily
You see it
That bitches is bad but I ain't chasing
You see it
Bitch, I've been ridin' in that A3
You see it
I'm talking love, but they still hate me
You see it
Still in all black, bitch, and that's daily
You see it
Ink in my skin, I ain't afraid, g
You see it
They wanna rush, but I got patience
You see it
Yeah, they want more, but I'ma say less
You see it

They wanna doubt my capabilities
But I just wanna be a realer me
They expect me to keep getting by
But my potential can't be classified

They wanna doubt my capabilities
But I just wanna be a realer me
They expect me to keep getting by
But my potential can't be classified

I feel like I'm in space, they said the sky was the limit
My expectations changed 'cause now we run up them digits
Now people come around and say they fuck with my vision
They say they got my back, but while they holding the trigger
