

# Eidolon

Once Human

Look back  
It's a hijack  
It's an attack in your being  
And the gun hunts continually  
In the blood of reality  
Another firewall separates  
We've got to break the brain's barricade  
Have we just begun?  
Are we just what's left in our lungs?

Another face in the cold of wanting  
Reality undone  
A number chained to the code of nothing  
Oh, I won't be that one  
Idle ways of a stable mind  
Cloak of Eidolon  
Laid over the pane of life  
This is the state of mine

Look now  
It's a blackout  
It's the crackdown of inner voice  
Overwrite the mind in white noise  
With white lies filling the voids  
Another brick wall separates  
Another pitfall setting us straight  
Are we none?  
Are we one?  
Is there truth kept under the tongue?

Another face in the cold of wanting  
Reality undone  
A number chained to the code of nothing  
Oh, I won't be that one  
Idle ways of a stable mind  
Cloak of Eidolon  
Laid over the pane of life  
This is the state of mine

Eidolon  
The pain of life  
This Eidolon  
Is the state of my  
Mind
