

Rainmaker

One Less Reason

Time flies away
You fill my heart and leave again
I thought you were my friend
And lies fill this place
And black clouds, they were made
Just to rain on me

You know that I was hurt that day
You know I never meant to say
That I don't need you
'Cause you know I need you

I'm tired of the rain
I'm telling lies to make you stay
Just one more day
I smile through the pain
I'm watching my life fade along the way

You know that I was hurt that day
You know I never meant to say
You know I'd never say
If I could, I'd take your pain away
You know I never meant to say
That I don't need you

And yooooouuuu...

You know that I was hurt that day
You know I never meant to say
You know I'd never say
If I could, I'd take your pain away
You know I never meant to say
That I don't need you
God knows I need you

And time flies away
You fill my heart and leave again
Just thought you were my friend
