One Night Only

We'll come back down
You can find where we are
Life slips by on an absent mind
You still smile and it picks me up

I've been staring at the window thinking
Where are you?
I've been staring at the window thinking
Where...

Come back down
Do you know where you are?
Life slips by on an absent mind
We have time to let goodness grow

I've been staring at the window thinking
Where are you?
I've been staring at the window thinking
Where...

I've been staring at the window thinking
Where are you?
I've been staring at the window thinking
Where are you?
