

Dark Blue

One Step Closer

Follow you 'til the end
And once it happens all again
Just make me numb inside
As I soak up all the pain you feel but I
And I could wish I had enough to say goodbye
As the months go by
And the blue jays fly to the apple trees tonight

Make me numb inside and soak all the pain

Slow as the coldness melts from me
Like a falling leaf
This scene, it breaks my focus
When things feel out of reach
Slow as the coldness melts from me
Like a falling leaf
This scene, it breaks my focus
When things feel out of reach

Call again
Remind myself that home is not worth missing
Am I lost this time?
Look at the sky until the stars align
I want to forget it happened when
Would you think
That I'll forget your existence?

Slow as the coldness melts from me
Like a falling leaf
This scene, it breaks my focus
When things feel out of reach
Slow as the coldness melts from me
Like a falling leaf
This scene, it breaks my focus
When things feel out of reach

The trees crash hard on me
Now that winter is gone
I want you close to get me through it
Sometimes it feels so far
When you call again
Yesterday felt the longest yet
Here comes the sound of loss

Summer tore into (Here comes the sound of loss)
The different shades of you (Here comes the sound of loss)
Picture perfect world (Here comes the sound of loss)
Without you here my world is blue (What do you know about love?)
Summer tore into (What do you know about love?)
The different shades of you (What do you know about love?)
Picture perfect world (What do you know about love?)
Without you here my world is blue
Don't wanna watch us split in two
