

Leap Years

One Step Closer

Watch you move out of time
Sign your name on the dotted line
If you wanna run and hide
Then tell me what you want from me

But I hope
That you'll bring some clarity
When I take myself too seriously
I'm left wide open

To leave so full of promises you left me nothing

I heard your name
And it's nothing but a dream again
Forget your face and it carried all of me
I heard your name
And it's nothing but a dream again
Forget your face and it carried all of me

But I hope
That you'll bring some clarity
When I take myself too seriously
I'm left wide open

Did you go and make a lie to see me broken?
To leave so full of promises you left me nothing

I heard your name
And it's nothing but a dream again
Forget your face and it carried all of me
I heard your name
And it's nothing but a dream again
Forget your face and you carried all of me

I'll wait for too long
I don't need to be alone

To be alone

So this time
I'll just standby
And watch as the months go by
When you find out
I'm not really gone, really gone
So this time
I'll just standby
And watch as the months go by
When you find out
I'm not really gone, really gone, really gone
