

I'm on my way to you, following this light
Following down the white path
Remaining behind the vanished time
Walking down the same path, alongside
Your scent that still lingers until now
Brings back the memories that remain hazy back to me again
Within the time that passed by me, flowing time
Goes to find you shining brightly down without a sound

Colors of red and blue purple lay them out
On top of that, we make love without a pain
The light still shines out bright at midnight
I believe all the lights are you, right
Aurora that you gave me always shines
Prism, purple, when it passes by me in the sky

I got this on my way
Aurora
It crossed over my head
Go ahead (Ooh, ooh-ooh)

Will you clear the cloud that's hiding you
And brighten you up even more with the dark night
Stay with me even if I own you
And remain longer as the light in the dark night

Leaving behind the regretful heart aside
I'll write the end of the unfinished stories haven't said
Between the countless stars spread up in the sky
Fill up and fulfill the night sky with your glowing light

Picturesque night but the sky is still bright
Along the milky way feels right
Find senses, ending being lost, light
I'll hold onto your warm hand tight
Aurora that you gave me always shines
Prism, purple, when it passes by me in the sky

I got this on my way
Aurora
It crossed over my head
Go ahead (Ooh, ooh-ooh)

Before the dark night sky leaves
It will remember you before it goes
The moon that stayed for a while
It will reach you and shine down all night, glow

I got this on my way
Aurora
It crossed over my head
Go ahead (Ooh, ooh-ooh)

Will you clear the cloud that's hiding you
And brighten you up even more with the dark night
Stay with me even if I own you
And remain longer as the light in the dark night
