

Theres a war going down between my brothers tonight
I dont want no war going down tonight
Civilization ha I call it as I see it
I call it bullshit you know I still cannot believe it
Our evolution now has gone the way of hate
A world evolved resolved in this stupid fate
Stop this war
All so different yeah I say were all the same
All caught you know in the division game
Self destruction fast impending like a bullet
No one can stop it once its fired no one can control it
Stop this war
A final word, wait it's not a call to action
We aint no sect we aint no fucking faction
Unity unity youve heard it all before
This time its not exclusive we want to stop a war
Unity as one stand together
Unity evolutions gonna come
