

Into the Arms of Morpheus

Orange Goblin

Fire up the engines
Set a course towards the fading sun
An endless journey has begun
Extermination
The age of anthropoid is done
An age of slumber has begun

The arms of Morpheus set me free
Drifting into eternal sleep
Remember nights of insomnia
I slip away to euphoria, praise the valium

Goodbye horizon
Take me to where I wanna be
Take me behind the wall of sleep
Lord, don't deny me
Come calm the storm behind my eyes
Oh lord don't fail to hypnotise

The arms of Morpheus set me free
Drifting into eternal sleep
Remember nights of insomnia
I slip away to euphoria, praise the valium

A numbness coursing through my veins
I hear the planets call my name
Death procession, astral flight
The coffins trail into the night...

Into the night
Into the night
Into the night
Praise the valium
