

Be With You

Orange & Lemons

If I could see the world
I want to be with you right now
'Cause when I dream of this
It happens all the time
Could I make it all without you
Oh, without you...

I know it when I find myself
Looking at the places I know
Paces I go

Every time I think of love
To free myself
It makes me feel so old
Still I know there will be time
To find a woman I could call my own

If I could see the world
I want to be with you right now
'Cause when I dream of this
It happens all the time
Could I make it all without you
Oh, without you...

Every time I think of love
To free myself
It makes me feel so old
Still I know there will be time
To find a woman I could call my own

And when I dream of this
I wish to be with you...
