

# It's About Time

Orange & Lemons

It's about time  
That I hear you say it  
Please tell me all the things  
I need to know

It's about time  
Now my heart's complaining  
I can't help myself  
I feel so insecure

And if you won't say it now  
It only goes to show  
That you never, never really need me  
You don't need me anymore

But then you came along  
Singing your song of love  
And all the words in it are all about me  
On the day you came along  
Singing your song of love  
Sing it loud and sing it clear  
Let everyone hear

It's about time  
Now the skies are grayin'  
I'd hate to wait for the time  
When rain would come and fill me

It's about time  
And I really need to know  
Do you feel it too?

And if you won't say it now  
It only goes to show  
That you never, never really need me  
You don't need me anymore

But then you came along  
Singing your song of love  
And all the words in it are all about me  
On the day you came along  
Singing your song of love  
Sing it loud and sing it clear  
Let everyone hear

Please say it now, say it now, say it now  
Please say it now, say it now, say it now

But then you came along  
Singing your song of love  
And all the words in it are all about me  
On the day you came along  
Singing your song of love  
Sing it loud and sing it clear  
Let everyone hear
