

Inside the Waves

Orbit Culture

Inside the waves (inside the waves)
I'm meant to be, yet drift away (away)
I meant to cut these ties in two
I am like you

These scars I fear
No shelter in the darkness trench
The lies we bury deep are
Lost in the sins we keep
And all these lies
No shelter in the obsolescence
The current pulls me down
I'm lost in the sin of my heart

It lies in the ocean with me

Inside the waves (inside the waves)
I'm meant to be, yet drift away (away)
I meant to cut these ties in two
I am like you (inside of the waves we belong)
Inside the waves (inside the waves)
I want to feel it, all the pain (the pain)
I meant to cut these ties in two
I'll break like you

These scars I hide
No refuge from the pace of time
I'll keep what's mine
No shelter in the obsolescence

It's all that's left of me
I'm lost in the sin of my heart

It lies in the ocean with me

The swirls of currents pull me
Down now beneath the sea
I find it hard to breathe now
I find it hard to see all

I'll be facing the rest of my broken life

Inside the waves (inside the waves)
I'm meant to be, yet drift away (away)
I meant to cut these ties in two
I am like you (inside of the waves we belong)
Inside the waves (inside the waves)
I want to feel it, all the pain (the pain)
I meant to cut these ties in two
I'll break like you (you)

Go

The ways of shadow thoughts
It cripples, giving me hell
The violence, the blinding
The flashing images kill me

The way it's killing me
The way I'm locking in
The violence, the blinding
The flashing images kill me

The way it's forcing me
The way it's taking me
The violence, the numbing
The flashing images kill me

The swirls of currents pull me
Down now beneath the sea
I find it hard to breathe now
I find it hard to see all

Inside the waves (inside the waves)
I'm meant to be, yet drift away (away)
I meant to cut these ties in two
I am like you (inside of the waves we belong)
Inside the waves (inside the waves)
I want to feel it, all the pain (the pain)
I meant to cut these ties in two
I'll break like you
