

See Through Me

Orbit Culture

I've fallen, through dark days
I've screamed out for help, but there's no one there
I've been trying, to see through the
The clouds, but my sun is nearly dead

Wherever it takes me
Whatever it does to me
I will need to find a way to live with this in me
Wherever it takes me
Whatever that comes for me
I will have the strength to fight it
But I'll always remember where I've been

I'm falling faster
I'm falling harder
I'm moving backwards
And there's no-one to fall back on to now
It's the way I've been feeling
It's the way I've been fighting
It's the way I've been dying
And there's only the darkness within me

I've never seen what's out there, what's out there
So how can I be so affected?

I am what I am, a strange face
And I cannot change what I am
I am where I am, in a changed place
And I cannot change who I am
Who I am
Who I am
Who I am inside of me
I'm in the darkness now

I'm falling faster
I'm falling harder
I'm moving backwards
And there's no-one to fall back on to now
It's the way I've been feeling
It's the way I've been fighting
It's the way I've been dying
And there's only the darkness within me

Explain
Everything that's right
And what's wrong with our falling earth
Is it me who mistreats me
Or is it earth coming against me

Explain
Everything that's right
And what's wrong with our falling earth
Is it me who can't explain
Or is it earth falling from me

I can't not explain what I've been feeling
But I can see in the dark, that's where I've been

I can't not accept to live through this
And I can't see you walk the same road as I
I can't let it harvest more victims
I can't not allow it to feed on our lives

The bright lights are cleaving the sea
We'll walk now
