

# Till the Stars Cry Out

Orden Ogan

Through the valleys  
Under stars  
Between mountains  
Among friends  
I shall wonder  
I shall pass  
Till the stars cry out  
My name as their friends

And the night will come as I lay down to sleep  
And day will gift me it's last light to keep  
And time will stop as long as I need  
Till in my heart there's no blood left to bleed

I'm the last in line  
On the road of no return  
A story that is never ending  
Haunted by their souls  
That cling to me like my guilt  
There's no one who could ever save me

Can you hear their cries brought here  
By the wind outside  
The rain kills all the lights  
And brings eternal night

And we are one  
Though we are so apart  
And we are one  
Alone in the dark

Who would have thought  
That this is real?  
That they would follow  
Bewitched, depraved  
This virus never dies

Through the valleys  
Under stars  
Between mountains  
Among friends  
I shall wonder  
I shall pass  
Till the stars cry out  
My name as their friends

And the night will come as I lay down to sleep  
And day will gift me it's last light to keep  
And time will stop as long as I need  
Till in my heart there's no blood left to bleed

And the wolves prepare to feast

Remember their bodies  
Slain and burned at the stake  
I carry all their pain  
More than anyone could take

Can you hear their cries brought here  
By the wind outside  
The rain kills all the lights  
And brings eternal night

And we are one  
Though we are so apart  
And we are one  
Alone in the dark

Who would have thought  
That this is real?  
That they would follow  
Bewitched, depraved  
This virus never dies

Through the valleys  
Under stars  
Between mountains  
Among friends  
I shall wonder  
I shall pass  
Till the stars cry out  
My name as their friends

And the night will come as I lay down to sleep  
And day will gift me it's last light to keep  
And time will stop as long as I need  
Till in my heart there's no blood left to bleed
