

First Time Blues

Orianthi

Remember the pain, the coldest dark, dark nights
I couldn't keep myself from breaking down
Marriage was playing in my mind
I drank too much, ran away from myself
When I saw him kissing somebody else

It felt like the first time
The first time I got the blues
It felt like the first time
The first time I got the blues

I picked my heart up, and I left that town
I didn't care to find no one
A lone wolf in a battleground
Then it came right in, ice river blue
I fell right in with all of me
Love's just a game I'm sure to lose

It felt like the first time
The first time I got the blues
It felt like the first time
The first time I got the blues

It felt like the first time
The first time I got the blues
It felt like the first time
The first time I got the blues
