

Rather Be

Orion Sun

Melodies that you sing to me
Underneath the sheets take me back to when we had no place to be
Just you and me in and out of dreams
Take me back to when we had no place to be

And I feel like your soldier with your head on my shoulder
There's no place I'd rather be
You know we in this together, no matter the weather
There's no place I'd rather be

There's no place I'd rather be

Wasting away just like the day we greet the night from our cave
Take me back to when we were in the same place
We were on the same page
We wanted the same things, remember when we had no place to be

And I feel like your soldier with your head on my shoulder
There's no place I'd rather be
You know we in this together, no matter the weather
There's no place I'd rather be

There's war outside the window, most of us are dying
Told you I'll be sober, here's to wishful thinking, some of us
are crying out
Some of us are flying now, tryna stay alive somehow
Curiosity, gotta see how this play out

And I feel like your soldier with your head on my shoulder
There's no place I'd rather be
You know we in this together, no matter the weather
There's no place I'd rather be

There's no place I'd rather be, ooh-ooh
