

Twilight Zone

Orion Sun

A rose's thorn made me cry
I couldn't see it on the path
It made me sit and face the wind
All I could do was lie in the grass
And let it pass

You're not around
I've entered now The Twilight Zone
I feel it when you're gone
Was it all a dream?
You was next to me
You was just next to me
You was just next to me
You was just next to

Lost another day to the void
How do I quiet all this noise?
It has been Thursday for quite some time
Swimming in this abyss in my mind, I

You're not around
I've entered now The Twilight Zone
I feel it when you're gone
Was it all a dream?
You was next to me
You was just next to me
You was just next to me
You was just next to

More and more
All in my brain about it more and more
Even when you get it, bet you still want more
I think it's time I cut the head off of this ouroboros
Yeah, the cycle end with me, clear the score board
I'm a light source, you a sore sport
Rolling up some weed just to feel the G-Force
Had to take a break from it, made my thoughts worse
Nightmares plaguing me and it still hurts

You're not around
I've entered now The Twilight Zone
I feel it when you're gone
Was it all a dream?
You was next to me
You was just next to me
You was just next to me
You was just next to
