

Move On

Orleans

Sometimes we're on our own
We lead our lives alone
The past has come and gone
Still memories linger on

But life's too short, we don't have time to kill
The days fly by when you're just standing still

You got to move on, move on
Go where you've never been
Heartaches start to fade
When you begin to leave them behind

I gave her all I had
'Til she made me feel so bad
I had to walk away
It hurt too much to stay

Well, there's no use in trying to pretend
One thing ends and we begin again

You got to move on, move on
Go where you've never been
Heartaches start to fade
When you begin to leave them behind

Hearts ache, hearts break
Somehow they mend
Time has been your friend

Time heals all wounds, they say
And love will find a way

You got to move on, move on
Go where you've never been
Heartaches start to fade
When you begin to leave them behind

You got to move on, move on
Go where you've never been
Heartaches start to fade
When you begin to leave them behind
Leave them behind
