

The Path

Orleans

Standing on a mountain top
I never saw a trace of you
So it's not true
Higher is a better view
You'll never know the details
Of the search you put me through
Since the day we kissed and came apart

I've been searching for something
I thought it was you
I've been searching for something
I couldn't put a name to
Searching for something
Different at the start
That set me on the path of my own heart

I've been into valleys
Deeper than I ever knew
And waters too
That I had to cross for you
I've been on this road so long
I think it must be true
The journey's end is just another start

I've been searching for something
I thought it was you
I've been searching for something
I couldn't put a name to, no
Searching for something
Different at the start
That set me on the path of my own heart

And now I see
The hungers that sent me far and wide
Can only feed
They can only feed on what I have inside

And I've been searching for something
I thought it was you
I've been searching for something
I couldn't put a name to, no
Searching for something
Different at the start
That set me on the path of my own heart

I've been searching for something
I thought it was you
I've been searching for something
I couldn't put a name to, no, no
Searching for something
Different at the start
