

## Two Faced World

Orleans

I met a man who told me his contacts were so fine  
I would be a big star if I'd sign his dotted line  
I wanted to believe so it took a while to see  
The only connection that he really had was me

It's a two faced world from the bottom to the top  
Two faced world, now where's it going to stop?  
(Not yet)

I gave my friend some money when his was running low  
I thought he'd always be there if I need a place to go  
I found out that he's just my enemy  
That good friend's been saying some bad things about me

It's a two faced world everywhere you look  
Two faced world, got me on the hook

I had a good, true lover - at least that's what she said  
So I was really shocked when I found her in his bed  
I really loved that woman but it took a lot of gall  
To look me in the eye and say "I just slept here, that's all"

It's a two-faced world, caught me in its trap  
Two-faced world, sittin' in the devil's lap

Once I had a country called the land of the free  
Pledged my allegiance to justice and liberty  
Now I think there's justice in the crack in the liberty bell  
We give them all their freedom by bombing them to hell
