

Don't Even

Otherwise

I'm not leaning to the left or right
I stand up straight to fight
I'm not allowed to sing
I have to scream 'cause I'm not white
And now the music industry owns my entire life
But that's okay because I got myself a thousand likes

Just smile for the camera, for the human race
How's that credit score lookin' and how that coffee taste?
You're sayin' fuck it, so fuck it, we'll do it live
Hey little snowflake, we all gon' die

Don't even think about it
Don't even think about it
Whatever helps you sleep at night
Don't even think about it
Don't even think about it
Whatever helps you (helps you)
Sleep at night

Drivin' cars that we don't need
Fed by the factories
Air we can't even breathe
Killin' all the honey bees
Slaves to the blue-light screen
Pawns to the kings and queens

Just smile for the camera, for the human race
How's that credit score lookin' and how that coffee taste?
You're sayin' fuck it, so fuck it, we'll do it live
Hey little snowflake, we all gon' die

Don't even think about it
Don't even think about it
Whatever helps you sleep at night
Don't even think about it
Don't even think about it
Whatever helps you sleep at night
Hush little baby, don't you cry
Shut your mouth and close your eyes
Don't even think about it
Don't even think about it
Whatever helps you sleep at night

You must be outta your mind
You must be outta ya goddamn mind
It's a sign of the times
We're just waitin' in line
We're just livin' to die

Don't even think about it
Don't even think about it
Whatever helps you sleep at night
Don't even think about it
Don't even think about it
Whatever helps you sleep at night
Hush little baby, don't you cry

Shut your mouth and close your eyes
Don't even think about it
Don't even think about it
Whatever helps you sleep at night

How do you sleep at night?!

(Don't even think about it
Don't even think about it)
