

## Simulation

### Our Lady Peace

I tried to come to your defences  
I know the things that you've been through  
And caught between the three dimensions  
The simulation's got you blue

There's a light in the corner of the distance  
There's a light illuminating just for you  
There's a light in the corner of the distance  
It burns my eyes, I'd go blind for you

I tried with all conventions  
Manipulate the things we knew  
I tried out where the sex is  
I'm doing my best to follow you

There's a light in the corner of the distance  
There's a light illuminating just for you  
There's a light in the corner of the distance  
It burns my eyes, I'd go blind for you

And all that this remains  
I won't let them bury you

There's a light in the corner of the distance  
There's a light illuminating just for you  
There's a light in the corner of the distance  
It burns my eyes, I'd go blind for you
