

Glory

Our Last Night

When everything feels like it's crashing down
And all you wanna do is end it now

You might be bruised and beat
But you're not broken
Feeling empty and alone
But you're not home
I promise there is more
(And just know)

Life's a trial
But I'm crawling through the fire
I'll keep rising
Every scar tells a story
In the end we'll find glory

When every road looks hopeless
'Cause the things you used to love
Have been fading away
From color to gray (From color to gray)

You might be bruised and beat
But you're not broken
Feeling empty and alone
But you're not home
I promise there is more (There is more)
(And just know)

Life's a trial
But I'm crawling through the fire
I'll keep rising
Every scar tells a story
In the end we'll find glory
In the end we'll find glory

When everything feels like it's crashing down
And all you wanna do is end it now

Just know life's a trial
But I'm crawling through the fire
I'll keep rising
Every scar tells a story
In the end (In the end)
We'll find glory (We'll find glory)
In the end (In the end)
We'll find glory
