

# Let Light Overcome The Darkness

Our Last Night

Let light, overcome the darkness  
Let light, be your shining armor

Right now  
You don't know  
If you even love yourself  
Drowned out, broken down  
With no one to turn to for help  
There's so many roads  
But there's only one way  
One way out of this  
The glow on the hill  
Is waiting for you to see it

Let light, overcome the darkness  
Let light, be your shining armor  
Open up your heart  
And watch all the panic burst into flames  
Let light, overcome the darkness

So delicate  
Even just a word

Could let the devil in  
Spinning around  
Stuck in a cycle of shame and doubt  
Our insecurities have a way  
Of keeping us down  
But the more you search the sooner  
You will escape from hell

Let light, overcome the darkness  
Let light, be your shining armor  
Just open up your heart  
And watch all the panic burst into flames  
Let light, overcome the darkness  
Overcome the darkness

(Let light, let light, let light overcome)  
(Let light, let light, let light overcome the darkness)
