

# Outnumbered

## Our Last Night

We will still overcome

Keep your head up as you wander these streets  
Your heart is strong when your flesh feels weak  
Waiting for the sun you can hardly breathe  
You're suffocating surrounded by enemies

There's danger in the shadows  
But you don't have to go alone  
There's danger in the shadows  
No, I won't leave you on your own

Outnumbered but we can't back down  
It's us against the world, us against the world  
Outnumbered but we can't back down  
Ten to one, on the run  
We will still overcome  
We will still overcome

Don't get stuck in the past, as you weather the storm  
Don't stray from the path even when it twists and turns  
They're watching every move you make  
But they're just skeletons, they're only skeletons

There's danger in the shadows  
But I won't leave you on your own

Outnumbered but we can't back down  
It's us against the world, us against the world  
Outnumbered but we can't back down  
Ten to one, on the run  
We will still overcome

Out of darkness we will rise  
Fight to survive  
In the eye of the storm  
We will still overcome

Out of darkness we will rise  
Fight to survive  
In the eye of the storm  
We will still overcome  
We will still overcome

Outnumbered but we can't back down  
It's us against the world, us against the world  
Outnumbered but we can't back down  
Ten to one, on the run  
We will still overcome
