

From Where You Are

Ours

I'm having one of those days
Nothing has changed
Still nothing's the same
Clouds don't be coming my way
Keep 'em away
Won't be feeling no pain

Someone tell me why I feel this way
Things like this don't happen everyday
I'll open up my heart
Go to where you are
My love will never be that far

From where you are
From where you are
From where you are
From where you are

Now I got the sun on my face
The birds are all singing
I got nothing to say
I'll only get in the way
I got nothing to say

Someone tell me why I feel this way
Things like this don't happen everyday
I'll open up my heart
Go to where you are
My love will never be that far

From where you are
From where you are
From where you are
From where you are

From where you are
From where you are
From where you are
From where you are

Nothing will keep me
Nothing will keep me

No time no money no fiery walls nothing they say could ever turn me off
Nothing in this world could keep me from where you are
No time no money no fiery walls nothing they say could ever turn me off
Nothing in this world will keep me from where you are

From where you are
From where you are
From where you are
From where you are

From where you are
From where you are
From where you are
From where you are

No time no money no fiery walls nothing they say could ever turn me off
Nothing in this world will keep me from where you are
