

Get That Feeling

Ours

Do you ever watch the stars at night
Do you ever dream of dreams
Can you see yourself together with me

You're a burning flame that lights the sky
And forever you will be
The one that got away from me

And as I follow you across the sky
I can't help falling further into your eyes

Get that feeling
Get that feeling now
I
Get that feeling
Get that feeling now
And I cannot look away, no

With so many in the dark around it's a wonder you can see
The ones that try to hurt you leave
If the world should ever break your heart
And you can no longer see
I hope you'll find your way home to me

Hand in hand we'll walk into the night
Where there's another day for you and I

Get that feeling
Get that feeling now
I
Get that feeling
Get that feeling now
Get that feeling
Get that feeling now
Get that feeling
Get that feeling now
And I cannot look away, no
I cannot look away
Get that feeling
Get that feeling now
I
Get that feeling
Get that feeling now
I get that feeling
Get that feeling now
I get that feeling
Get that feeling now

Stars are flying in the air
Stars are flying everywhere
Stars are flying up above
When we love
Stars are flying everywhere
Stars are flying in the air
Stars are flying everywhere
Stars are flying up above
When we love

Stars are flying everywhere
