## **Get Up**

Get up Stop breathing yourself up These are the things that you know will just hurt Don't let em Weaken your heart You've been here before and you swore that you would Get up Begin to start These are the things that you want to remember Remember Why Tell me why Must I wait around to find out that I'm dying By wasting time Man you should have seen her Man you should have come Maybe when you wake you'll sleep because Get up Get up Stop breathing yourself up These are the things that you know will just hurt Don't let em Weaken your heart You've been here before and you swore that you would Get up Begin to start These are the things that you want to remember Remember Remember Get up Man you should have seen her The weight rolled off her back Gave so much love Without even trying Man you should have seen her Was beautiful like rain To weather all the world And stay the same Stay the same Man you would have loved Man you would have loved Get up ... And the more you love you'll love
