

# Way the World Turns

## Outline in Color

Euphoria was late  
My paradise awaits  
Everything is perfect the way it seems  
It's like I'm stuck in some strange great dream  
The curse of mine  
These black wolf omens  
They poison my heart with hope  
But something is in the way  
This is gonna get loud  
You are only what you answer to  
If you don't choose your moments  
They'll be chosen for you  
This is gonna get loud

So let it sink in  
And let it take you home  
This feeling only few will ever know  
And then just breath in  
And let it make you whole

Oh  
And that's the way that the world turns  
Don't you wish it could last?  
Just a little longer  
Just a little longer  
Before it fades into the past  
And oh  
It's just the way that the world turns  
Don't you wish it could last?  
Just a little longer  
Just a little longer  
Before it's gone forever  
Just a little longer  
Just a little longer  
Oh

Messiah of the mind  
It's alive  
It's alive  
It's alive  
How am I supposed to feel happy?  
When this feeling has truly trapped me  
You are only what you answer to  
If you don't choose your moments  
They'll be chosen for you

And here I though I'd spend the rest of my life  
Convinced that happiness was a lie

So let it sink in  
And let it take you home  
This feeling only few will ever know  
And then just breath in  
And let it make you whole  
So let it sink in  
And let it take you home  
This feeling only few will ever know

And then just breath in  
And let it make you whole

And oh  
And that's the way that the world turns  
Don't you wish it could last?  
Just a little longer  
Just a little longer  
Before it fades into the past

Oh  
And that's the way that the world turns  
Don't you wish it could last?  
Just a little longer  
Just a little longer  
Before it fades into the past  
And oh  
It's just the way that the world turns  
Don't you wish it could last?  
Just a little longer  
Just a little longer  
Before it's gone forever  
Just a little longer  
Just a little longer  
Oh  
Just a little longer  
Just a little longer  
Oh
