

Into The Light

Over October

New year's eve's around the bend
Where are all the lights?
Another year's about to end
But you're not by my side

Oh, can you see how much we've changed
Can't you see that we're to blame
Oh, can't you see that we are victims of our own doing?

Out of the darkness and into the light
When I look to the stars all I see are your eyes
Though you live through the pictures I'm dying inside
I know I'll spend Christmas alone
And I'll get through the next on my own

How you been my long lost friend
It's been quite a while
Tides of time and oohs of wind
Flash before my eyes

Oh, can't you see how much we've changed
Can't you see that we're to blame
Oh, can't you see that we are victims of our own doing?

Out of the darkness and into the light
When I look to the stars all I see are your eyes
Though you live through the pictures I'm dying inside
I know I'll spend Christmas alone
And I'll get through the next on my own

I know I'll spend Christmas alone
And I'll get through the next on my own
