

## Stay

Over October

Hey what you doin' what you going through  
Acting like it's nothing but nobody knew  
Faces you once trusted must've made you do  
Things you never acted on out of the blue

Blamin' feelings taking healin' I'll stay  
Got no bias I'll listen to what you say

When you falter I will catch you don't you live in yesterday  
If you wonder don't you doubt me I will love you just the same

It's a dark world where you're stayin' you're far from home  
On your knees I see you prayin' you're not alone

Blamin' feelings taking healin' I'll stay  
Got no bias I'll listen to what you say

When you falter I will catch you don't you live in yesterday  
If you wonder don't you doubt me I will love you just the same

When you falter I will catch you don't you live in yesterday  
If you wonder don't you doubt me I will love you just the same  
When you falter I will catch you don't you live in yesterday  
If you wonder don't you doubt me I will love you just the same
