

Without Your Love

Over October

Hey, I've been watching you been taking down notes about the things you do
But baby, don't get me wrong I'll explain in this song what I mean
You just do that thing you do playing with my feelings like it's nothing new
Pretending you were the victim but the truth was you picked him instead

Love will come to those who wait
I've been waiting and I figured it out the hard way

I don't want to feel another heart break
Even if it's meant just to test my love
I think I'll just live under a boulder
Cause life will feel less colder without your love

Manipulator faker taker up and down the escalator
See you later I'm a hater we don't got a thing that's greater
Said I made you happy when you're feeling down
Sent some funny stickers getting rid of your frown
We talk about us and we talk about life
I talked about that things that would make you feel nice
Didn't get the picture right away from the start
You didn't take advantage but there's a hole in my heart

Love will come to those who wait
I've been waiting and I figured it out the hard way

I don't want to feel another heart break
Even if it's meant just to test my love
I think I'll just live under a boulder
Cause life will feel less colder without your love

They say love will come to those who wait
Well, I'm done waiting and I hope you listen when I say

I don't want to feel another heart break
Even if it's meant just to test my love
I think I'll just live under a boulder
Cause life will feel less colder without your love
