Firefly

Over the Rhine

My memory will not fail me now
My memory will not fail me
My memory will not fail me now
My memory will not fail me

Ooh, firefly in the night sky
Only lights on the rise
And I need you so firefly

One satellite with a lazy eye
Caught me by surprise
With an ache in my belly
And a taste in my mouth for fire

My memory will not fail me now
My memory will not fail me
My memory will not fail me now

Ooh, firefly in the night sky
Only lights on the rise
After the killing frost
Where do you go, firefly

My memory will not fail me now
My memory will not fail me
My memory will not fail me now
And the rest is history
The rest is history
