Strokes

Ovlov

You make disaster while you sail on black waters
Go off and save the mess you made on black waters
It wasn't safe to be honest
Grow and shave all the offset

And you warn to save time
Before you wait; why?
But you nod to save time and belong to safe tries

You waste your mind to settle down black waters
You face the side of better times in black waters
Weather changes your mind
Bet you'd call me inside

And you warn to save time
Before you wait; why?
But you nod to save time and belong to safe tries
