

## Seasons in the Darkness

Oz

Hiding from the rain that's fallin' through the frozen rainbow  
They took the gold and left the king to die  
A thousand footsteps in the snow, but no-one heard the laughter  
Kingdoms fell before the evil eye

Guided by the stars above, they travelled in the darkness  
Blazing torches showing them the way  
Nights were getting longer and the shadows they grew taller  
The prophet said the sun was turning grey

Hear the way the wind blows  
See the lightning strike  
When the heavens thunder  
We are all alive

They could see their destination, in the black horizon  
Shining like a diamond in the dark  
Yesterday it used to be the city of the angels  
All those evil spirits left a mark

Rising up to see the light they climbed onto the mountain  
Hoping they would see another day  
Wishing they could light the candles, see the sun a-rising  
Illuminate the world and make it stay

Seasons in the darkness, demons at your back  
Seemed to last forever, and the world was black

Hear the way the wind blows  
See the lightning strike  
When the heavens thunder  
We are all alive

Seasons in the darkness, demons at your back  
Seemed to last forever, and the world was black

Seasons in the darkness...  
Seemed to last forever...  
Seasons in the darkness...
