

Eventide

Ozark Henry

all says crisis
we don't know what it's about
in your face it's coming clear
you have your doubts
where we find ourselves back
where we found us
will we harness what is ever ever bright
will we walk this
walk this earth and put it right
where we find ourselves back
where we found us
eventide
take the time to talk
tell me how you feel
eventide
let something new arise
what is broken is not lost
and nothing's beyond today
eventide
let something new arise
I don't get this
we can wait this weather out
calmly crashing
echo raindrops in a drought
where we find ourselves back
where we found us
eventide
take the time to talk
tell me how you feel
eventide
let something new arise
what is broken is not lost
and nothing's beyond today
eventide
let something new arise
