

Nothing Feels Right

Ozzy Osbourne

Count the seconds catch my breath
Feelings come and go again
Count my blessings hope they hear me too, too
Trapped inside this spider web
Scared of life and scared of death
Trapped inside these walls I built of doom, doom

Won't you let me, won't you let me through
Don't regret me, even when I do

I've been calling out for someone
Mouth around the gun
Nothing feels right
Nothing feels right
All the pain gets trapped in my lungs
Drowning in my blood
Nothing feels right
Nothing feels right

Is it a lost fight
Or is it a long drive home
Long drive home

Lost what I've been dreaming of
One eye open one eye shut
Lost the only ones I ever loved
My reflection beats me up
Smiling as I take the punch
My reflection is my favorite drug

Won't you let me, won't you let me through
Don't regret me, even when I do

I've been calling out for someone
Mouth around the gun
Nothing feels right
Nothing feels right
All the pain gets trapped in my lungs
Drowning in my blood
Nothing feels right
Nothing feels right

Is it a lost fight
Out on the front line
Will I watch the sunrise?
As I take the long drive home, long drive home
Long drive home
Long drive home

I've been calling out for someone
Mouth around the gun
Nothing feels right
Nothing feels right
All the pain gets trapped in my lungs
Drowning in my blood
Nothing feels right
Nothing feels right

Nothing feels right
Nothing feels right
Nothing feels right
Nothing feels right

Is it a lost fight
Out on the front line
Will I watch the sunrise?
As I take the long drive home
